Declassified in Part - Sanitized Copy Approved for Release 2012/06/12 : CIA-RDP82-00457R009100520011-6 CONFIDENT 50X1-HUM ROL/US OFFICIALS ONLY officer candidate school was located in Gyoer (P 48/Y 44). Barracks Installations in Kecskemet and Baja. 5. In Parch 1951, a large building site was located on the south side of the road from Kecskemet (Y 6/N 95) to Iszak (Y 6/N 6h) and about 3 km southwest of the intersection of the railroad line and this road. It included three multi-story buildings, about 50 meters long, with flat roofs. Hungarian officers with motor vehicles, who apparently were inspecting the construction work, were observed near the building site. 6. On 20 April 1951, a barracks installation was observed in Baja (Y 6/S 28), about 200 meters east of the railroad bridge over the Danube River and about 50 meters south of the railroad line. Miscellaneous Units at the 1951 May Review. 7. An AAA regiment located in Budapest participated in the review. It proceeded toward the parade ground with one gun battalion and two machine gun battalions. The tuns were towed by ZIS trucks. a motor 50X1-HUM regiment with medium and heavy mortars towed by weapon carriers, and an AT regiment of three battalions with 36 x 76-mm AT guns, also towed by weapon carriers. About 50 JS tanks referred to as T-72 models belonged to a tank unit from Esztergon (42/2 27). (4) Besides other well-known tank and SP gun models, an SP-gun-shaped caterpillar vehicle of an estimated weight of 25 tons was observed. The tracks, suspensions, and hull resembled those of the T-34/85 tank. The vehicle mounted no turret. Instead, a gun barrel with cooling fins on its rear section was installed behind a low and almost vertical armor plate. The barrel, which had a funnel-shaped muzzle, was about 2 meters long and projected about 70 cm beyond the armor plate. (5) 50X1-HUM Comments, heavy artillery unit observed. This opinion is based on the fact that there were too many guns for one regiment. The artillery regiment located in

(1) Several units are believed to have been assembled for the parade into the Szentendro may belong to the artillery division located in Iresi. (2) In view of the specification, the Soviet model 1943 152-mm field howitzer, which was not previously observed in the satellite armies, may have been seen. 50X1-HUM

(4) No previous report mentioned a T-72 tank model. According to a previous report of 1949, JS tanks were observed at the tank regiment in Esztergom.

(5) In view of the description, the vehicle cannot be classified as one of the known Soviet tank models.
